

Comprehensive Successful Twinning Experience

Enjoying an advantageous geographical location and traditionally good relations with the Eastern European countries, Austria serves as a bridge between Eastern and Western Europe. Thus in the course of the enlargement of the European Union, Austria has played a prominent role and has intensified its contacts with the neighbouring Accession Countries/New Member States.

Particularly in the sector of EU Twinning Institution Building Partnerships introduced in 1998, Umweltbundesamt (Environment Agency Austria) has proved to be a highly engaged partner. The institution has offered valuable expertise and has demonstrated its capability for efficient problem-solving within a wide range of this EU instrument. The beginning was set with sharing the still recent EU accession experience of Austria (1995) and jointly working out a broad spectrum of border and regional concerns with the first wave of Accession Countries / New Member States. The commitment of the Environment Agency Austria to share its practical experience and lessons learned has become a relevant institutional and technical support to the European integration and Good Neighbourhood Policies in the environment area.

As of April 2023, the Environment Agency Austria has implemented more than 110 successful twinning projects with EU Accession Countries, New Member States, and with several European Neighbourhood countries East (Georgia, Ukraine) and South (Algeria, Jordan, Morocco, Egypt) and has been chosen as partner institution in the following Twinning projects.

Codes:
